

PROJECT GALLERY OF JANTA RENEWABLE ENERGY

We are India's leading company providing solar solutions, tapping into the vast source of renewable energy and converting it into a viable power source. The **JANTA RENEWABLE ENERGY (JRE)** group provides a unique combination of photovoltaic power plant expertise and unparalleled experience in designing. From residential communities to manufacturing units to business hubs, JRE has delivered turnkey solar projects for sustainable energy sourcing.

With solar power plant installations of more than 5 MW underway and more than 3.9 MW of Solar Rooftop PV Systems across India, JRE India brings international expertise with German Quality and Engineering practices to meet the customer requirements in India.

For the growing Indian solar PV market, JRE India offers engineering design, procurement, and construction (EPC) solutions using world class German Technology into solar PV installations which means best value proposition for its clients.

The JRE Commitment: We are committed to solar power. Society no longer has a choice about changing the way it produced energy; in fact the process is already irreversible – for both ecological and economic reasons. The intelligent use of photovoltaic technology reduces damage to environment caused by CO₂ emissions, conserves raw materials and ensures strong returns.

The Benefits of Working with JRE : Since 2014 Janta Renewable Energy has gained a wealth of valuable experience through its numerous large-scale projects – something you can turn to your advantage. We combine exceptional reliability with first-class service, from your initial inquiry right through to project completion. Our innovative, high-performance products are constantly tested and enhanced in our own laboratories to ensure they meet the legendary Janta Renewable Energy quality standards.
